

# Platform Introduces HPC Academic Bundle

A Complete HPC Solution for Academics

Platform HPC Academic consists of:

- Platform LSF®
- Platform MPI
- Platform RTM
- Platform LSF MultiCluster
- Platform Management Console
- 24x7 technical support

This unparalleled offering is ideal for institutions that have been making do with open source software lacking in power and functionality.

Specially designed for research and education institutions with High Performance Computing (HPC) programs.

- Contains leading technologies from Platform Computing
- Application-centric solution bundles
- Provides necessary tools to optimize HPC application performance of Platform HPC management solutions offered through:
  - Red Hat (Red Hat HPC Solution)
  - Dell (Platform Open Cluster Stack - Dell Edition)

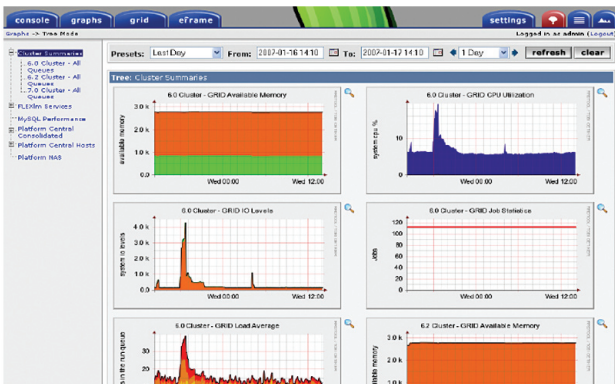

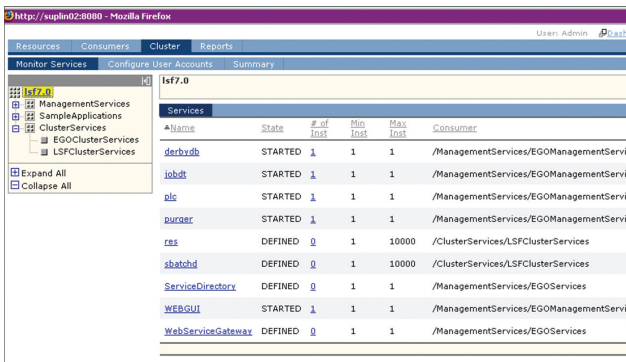

## Upgrade your HPC cluster

With the least effort and at an affordable price

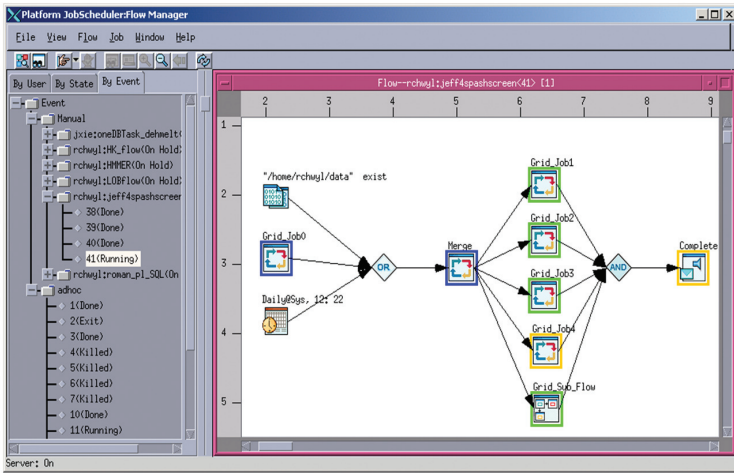

Platform has been aggressive in delivering leading edge solutions to both the commercial and public sectors since 1992. In response to requests from our customers in the academic world, whose HPC requirements are becoming more and more sophisticated, and require solutions of commercial quality, Platform is introducing this unmatched opportunity to play on an even field with the corporate world.

Platform HPC Academic is a competitively priced end-to-end product bundle. It is designed to deliver the world's leading and most comprehensive workload management solution to the academic market, making it affordable for institutions of all sizes and budgets. This complete solution supplies all the tools and functionality needed to accelerate compute and data intensive applications, and manage cluster and grid systems.

Platform's objective is to deliver superior technology and commercial support to educational institutions at prices they can afford. Platform HPC Academic makes it even easier for universities and research labs to improve the performance of their HPC systems, while controlling costs and reducing the time to results.

## Full solution-set bundle with Platform LSF® and supporting products

### What's included:

- Platform LSF – Best quality, high performance, flexible, workload management
- Platform MPI – Commercially supported high performance, fault tolerant MPI library and run time environment
- Platform RTM – Workload & system monitoring, reporting, and application profiling tool
- Platform Management Console – Web portal for users and administrators
- Platform MultiCluster – Share resources among multiple clusters and systems
- Platform Support – The industry leading support services for all above products
- Optional: Platform Process Manager – Workflow and data management tool for HPC users

### Value to you:

- Industry leading technology focused on ease of use, performance, and reliability
- Complete solution for running high performance applications in HPC environment
- Benefit from cross industry experience and best practices
- Backed up by global and the industry leading 24x7 technical support team to provide peace of mind
- Affordable price for research and education customers – Typical Price \$44 / core for the bundle

## Through Dell, Platform also offers, Platform OCS – Dell Edition bundle

### Deploy in new cluster or upgrade from existing cluster with older software

- New aggressive pricing offers you the most robust HPC solution at an affordable price available from Dell
- Average price at \$22/core per year
- Includes world class 24 x 7 support
- We provide global, rapid response 24x7 extended technical support. Via 24-hour Hotline

# Platform™

Platform Computing is a pioneer and the global leader in High Performance Computing (HPC) management software. The company delivers integrated software solutions that enable organizations to improve time-to-results and reduce computing costs. Many of the world's largest companies rely on Platform to accelerate compute or data intensive applications and manage cluster and grid systems. Platform has over 2,000 global customers and strategic relationships with Dell™, HP, IBM®, Intel®, Microsoft®, Red Hat® and SAS®, along with the industry's broadest support for HPC applications. Building on 16 years of market leadership, Platform continues to define the HPC market. Visit [www.platform.com](http://www.platform.com).
