

# Corporate Factsheet

## Corporate

---

Platform Computing is the leader in cluster, grid and cloud management software – serving more than 2,500 of the world’s most demanding organizations. Since 1992 our workload and resource management solutions have delivered IT responsiveness and lower costs for enterprise and HPC applications.

Founded in 1992, Platform Computing is a privately-held, entirely self-funded company. Platform Computing’s leadership team consists of experienced industry leaders:

- Songnian Zhou, CEO
- Peter Nichol, General Manager
- Ian Miller, Vice President, Worldwide Sales
- Jingwen Wang, Vice President, Products
- Tripp Purvis, Vice President, Business Development
- Jay Muelhoefer, Vice President, Marketing
- Andrew Giblon, Vice President, Support & Services
- Peter Richardson, Vice President, HR
- Patrick Paulin, Vice President, Finance & Administration

Headquartered in Toronto, Canada, Platform Computing has a strong global presence, with over 500 employees in offices across North America, Asia Pacific and Europe.

## Lines of Business

---

### HPC

#1 commercial workload and resource management solutions providing comprehensive ease-of-use for small clusters to powerful customizable for the largest of deployments

### Grid

High-performance service-oriented architecture (SOA) grid workload management software for financial institutions and other organizations deploying computationally intensive parallel grid applications

### Private Cloud

Private cloud management software to help enterprises build private / hybrid clouds for Infrastructure-as-a-Service (IaaS) across physical, multi-hypervisor, and external cloud resources

### Big Data

best-of-breed distributed runtime engine for MapReduce delivering a proven platform for enterprise-class Hadoop applications and shared services

## Products and Software

---

Whether it’s in the HPC technical design data center, in the demanding environment of financial services risk management applications, or in a private cloud, Platform Computing’s software helps manage nearly 5 million CPUs around the world. Platform Computing products drive faster performance, more flexible sharing, and ultimately, the best use of valuable IT resources possible.

## Customers & Partners

Platform Computing's customers include industry leaders such as: Hewlett Packard, Procter & Gamble, Fiat, Shell, Audi, Red Bull Technology, JPMorgan Chase, British Gas, Société Générale, MIT, Pratt & Whitney, Nvidia, Northrop Grumman, Hitachi, Nissan, Bombardier, Lockheed Martin, Petrobras, Ford, Rambus, Motorola, AstraZeneca, StatoilHydro, Samsung, BAE Systems, Fujitsu, Kimberly Clark, DuPont, SAS, Airbus, Canon, Toyota, Toshiba, Eli Lilly, Prudential, Sony

Platform Computing has strategic relationships with Cray, Dell™, HP, IBM®, Intel®, Microsoft®, Red Hat® and SAS®.

Platform Computing supports the industry's broadest application integration library including ABAQUS, ANSYS, Cadence, Dassault, Schlumberger. In addition, independent software vendors such as Microsoft®, Red Hat® and SAS® consider Platform Computing's software a key component of their strategy.

## Industry

### Leadership

Platform Computing was a founding member of the New Productivity Initiative (NPI), which merged with the Global Grid Forum (GGF) in 2002 and is now known as the Open Grid Forum (OGF).

### Recognition

#### InfoWorld 100 Award 2009

Platform Computing customer Harvard Medical School (HMS) was recognized for deploying one of the top 100 information technology (IT) projects in 2009

#### InfoWorld 100 Award 2008

Platform Computing customer Red Bull Technology Ltd. was recognized in the technology category for their high performance computing environment geared toward testing and designing Red Bull's Formula1 cars.
